OutCome:
Major Project-I provides an important foundation for the successful completion of the final-year engineering project. It enables students to identify and analyse real-world engineering problems, conduct literature surveys, formulate suitable methodologies, and apply engineering knowledge to develop feasible solutions. The project enhances students' technical, analytical, design, teamwork, communication, and project-management skills. It also promotes consideration of sustainability, safety, ethics, cost, and societal requirements in engineering decision-making.

Impact:

- 1 Enhances practical application of theoretical knowledge.
- 2 Improves problem-solving and analytical thinking abilities.
- 3 Develops design and innovation capabilities.
- 4 Exposure to real-world engineering problems and industrial practices.
- 5 Improves teamwork, leadership, and interpersonal skills.
- 6 Strengthens technical communication and presentation skills.
- 7 Understanding of project planning, cost estimation, scheduling, and resource management.
- 8 Encourages students to use modern engineering tools and technologies.
- 9 Builds confidence for undertaking Major Project-II, internships, higher studies, research
- 10 Develops the ability to work independently and promotes lifelong learning

Conclusion:

Students become better prepared for Project, industry, research, higher studies and entrepreneurship
