

Name -Jatin Rai

College –LNCT BPL , ME

Company- Ulta-Tech Cement

Package-5.5

My journey through the Mechanical Engineering program has been a highly enriching and rewarding experience. Over the past four years, I have gained strong technical knowledge, practical skills, and valuable industry exposure that have prepared me for a successful professional career.

The faculty members have been supportive, knowledgeable, and dedicated to helping students achieve both academic and personal growth. The well-equipped laboratories, workshops, and project-based learning opportunities provided an excellent environment for developing engineering skills and problem-solving abilities.

The college has also encouraged participation in technical events, seminars, industrial visits, and extracurricular activities, which helped enhance my confidence, teamwork, and leadership qualities. The guidance and support received from the department have played a significant role in shaping my professional outlook.

I am grateful to the Mechanical Engineering Department and the entire institution for providing me with a strong foundation for my future career. I will always cherish the memories, friendships, and learning experiences gained during my time here.
